

HOME EV CHARGING SOLUTIONS

Smart, affordable EV charging for your home

- Professional installation in as little as one day
- NICEIC approved & OZEV grant eligible
- Smart chargers from leading UK brands

AMP Renewables is committed to enabling access to emerging clean energy technologies for individuals and businesses across the UK. With a team of 20+ skilled professionals and nationwide coverage, we are your trusted partner for home EV charging installations.

Evolved from a Mechanical & Electrical heritage, we bring deep electrical expertise to every installation — ensuring safety, reliability, and quality workmanship.

Why Choose Amp Renewables?

NICEIC Approved

Electrically competent person scheme approved, giving you peace of mind that all work meets regulations.

OZEV Approved

Approved installer for the government OZEV grant scheme, helping you save on your charger installation.

Local North East Experts

Based in the North East of England with deep local knowledge, we also offer nationwide coverage across the UK.

Expert Electrical Team

Our skilled engineers and supervisors have deep M&E experience, ensuring safe and reliable installations.

Smart Tariff Support

We install chargers that integrate with smart energy tariffs, helping you charge at the cheapest rates.

End-to-End Service

From initial survey through to installation, activation, and ongoing support — we handle everything.

Save with the OZEV Grant

The Office for Zero Emission Vehicles (OZEV) offers government grants to help with the cost of installing a home EV charger. Eligible applicants can receive up to £350 off their installation (increasing to £500 from April 2026). As an OZEV-approved installer, we handle the entire application on your behalf — the grant is deducted from your quote automatically.

Ohme Home Pro

7.4kW Smart Tethered Charger

Fully installed from

£1,099

Key Features

- Tethered 5m or 8m Type 2 cable included
- Built-in 3G/4G connectivity (no Wi-Fi needed)
- Clear LCD screen for live charging data
- Smart energy tariff integration
- Compatible with Octopus Intelligent Go
- Solar Boost — charge from your solar panels
- Built-in PEN fault protection (no earth rod)
- Dynamic load balancing pre-wired
- Approve every charge session for security
- Over-the-air software updates
- OZEV grant eligible

Ideal For

- ✓ Homeowners who want a premium, feature-rich charger
- ✓ Those on smart energy tariffs (save significantly on charging costs)
- ✓ Properties where Wi-Fi signal is weak near the driveway
- ✓ Solar PV owners looking to maximise self-consumption

Technical Specifications

Power Output	7.4kW / 32A
Supply	230V AC, 50Hz
Connector	Type 2 (tethered)
Cable Length	5m or 8m available
Connectivity	Built-in 3G/4G SIM
Protection	RCD Type A 30mA + 6mA DC
PEN Fault	Built-in (no earth rod)
Load Balancing	Dynamic (pre-wired)
Display	LCD screen
Warranty	3 years
Colours	Black / White

Smart charging, built in

A premium tethered charger with a clear LCD display and deep smart-tariff integration — engineered to make every charge cheaper and simpler.

Shown: Ohme Home Pro. Fully installed by AMP Renewables.

Ohme ePod

7.4kW Smart Untethered Charger

Fully installed from
£1,049

Key Features

- Untethered design — use your own cable
- Compatible with Type 1 and Type 2 vehicles
- Ultra-compact: just 230 x 140 x 100mm
- Lightweight at only 1.5kg
- Built-in multinet SIM (always connected)
- Smart energy tariff integration
- Solar Boost for green charging
- Dynamic load balancing built-in
- Touch-sensitive controls
- Over-the-air firmware updates
- OZEV grant eligible

Ideal For

- ✓ Homeowners who prefer a clean, minimalist look
- ✓ Those who share a charger between multiple EVs
- ✓ Properties with limited wall space
- ✓ Budget-conscious buyers wanting premium smart features

Technical Specifications

App Control	Hypervolt app
Smart Tariff	Yes
Solar Ready	Yes

Designed to be seen

A sleek, Wi-Fi connected charger in a premium finish, with app control and solar-ready smart charging for your home.

Shown: Hypervolt Home 3 Pro. Fully installed by AMP Renewables.

Sigen EV AC Charger

7kW Smart Charger — Tethered or Untethered

Fully installed from
£1,150

Key Features

- Tethered 5m Type 2 cable or untethered socket
- Built-in 4G, Wi-Fi & Ethernet connectivity
- Solar Boost — charges from spare solar
- Battery Boost — top up from your home battery
- Sigen AI Mode for smart tariff scheduling
- Integrated PEN fault protection (no earth rod)
- IP65 & IK10 rated for outdoor installation
- Works as one system with SigenStor battery
- Dynamic load management built in
- Full control via the mySigen app
- OZEV grant eligible

Ideal For

- ✓ Homeowners with a Sigenenergy SigenStor battery
- ✓ Those wanting solar, battery and car in one app
- ✓ Properties needing a rugged IP65/IK10 charger
- ✓ Anyone choosing tethered or untethered flexibility

Technical Specifications

Power Output	7kW / 32A
Supply	230V AC, 50Hz
Connector	Type 2 (5m or socket)
Connectivity	4G / Wi-Fi / Ethernet
App Control	mySigen app
Protection	Integrated RDC-PD
PEN Fault	Built-in (no earth rod)
Load Balancing	Dynamic (built-in)
Enclosure	IP65 / IK10
Dimensions	234 x 384 x 126mm
Warranty	3 years
Colour	White

One system, one app

Pairs natively with a SigenStor battery so your solar, battery and car work as one — with Solar Boost charging the car from spare generation.

Shown: Sigen EV AC Charger. Fully installed by AMP Renewables.

Tesla Wall Connector

7.4kW Smart Tethered Charger

Fully installed from
£1,300

Key Features

- Tethered 7.3m Type 2 cable — one of the longest available
- Charges any Type 2 EV, not just Teslas
- Built-in Wi-Fi with automatic over-the-air updates
- Full control & monitoring via the Tesla app
- In-app scheduling to charge on cheap off-peak rates
- Built-in RCD Type A + 6mA DC protection
- Power sharing across up to 6 units on one circuit
- Rated for indoor and outdoor installation
- Sleek, screen-free design with LED status strip
- 4-year residential warranty
- On the OZEV-approved chargepoint grant list

Ideal For

- ✓ Tesla drivers who want a seamless in-app experience
- ✓ Households with any make of Type 2 EV
- ✓ Homes needing a long 7.3m tethered cable to reach the car
- ✓ Those who want a premium, minimalist charger in white

Technical Specifications

Power Output	7.4kW / 32A
Supply	230V AC, 50Hz
Connector	Type 2 (tethered)
Cable Length	7.3m integrated
Connectivity	Built-in Wi-Fi
App Control	Tesla app
Protection	RCD Type A + 6mA DC
PEN Fault	External device fitted
Load Sharing	Up to 6 units
Display	LED status strip
Warranty	4 years
Colour	White

Premium by design

The Tesla Wall Connector blends a clean, screen-free finish with rugged, all-weather build quality — a charger that looks as good as it performs.

Shown: Tesla Wall Connector (Gen 3), fully installed by AMP Renewables.

Getting your home EV charger installed is simple. We handle everything from start to finish.

01

Get in Touch

Contact us by phone, email, or through our website.
We'll discuss your requirements and answer any questions.

02

Free Home Survey

Our qualified surveyor will visit your property to assess the best location, cable routing, and electrical capacity.

03

Your Quote

We'll provide a transparent, fixed-price quotation with no hidden extras — what you see is what you pay.

04

Professional Installation

Our NICEIC-approved engineers will install your charger, typically completed within a single day.

05

Activation & Handover

We'll set up your charger app, test everything thoroughly, and walk you through how to use your new charger.

Benefits of Home EV Charging

Save Money

Home charging costs a fraction of public charging. With a smart tariff, you could pay as little as 7p per kWh — around £2 for a full charge.

Total Convenience

Wake up to a fully charged car every morning. No more queuing at public chargers or planning your journey around charging stops.

Increase Property Value

A home EV charger is an attractive feature for buyers, adding value and future-proofing your property for the electric revolution.

Go Greener

Pair your charger with solar panels to charge your EV from 100% renewable energy generated on your own roof.

READY TO CHARGE AT HOME?

Get in touch today for your free, no-obligation home survey and fixed-price quotation.
